

Transportation Investment Act of 2010

DATE: February 21, 2011

ATTN: Regional Commissions

SUBJECT: Filling out project submittal forms for GDOT programmed projects for the unconstrained list

There have been some concerns regarding accessing the information/data needed for the project submittal forms, specifically for GDOT programmed projects (i.e. these have PI#s assigned). If you have received and/or get questions regarding this, there's going to be some flexibility as far as what information needs to be on the form considering that we already have this information in-house. At a minimum for **GDOT programmed projects only**, local jurisdictions/sponsors should include on the form the following numbered sections: items 1 through 6 and item# 8.

Items 7, 9 and 10 may not be as readily accessible for some local governments; so they can fill those out to their best ability. Please note for item #7 (project description summary), some jurisdictions may want a project that's already programmed by GDOT to be shorter or longer in length. For those cases, item# 7 is imperative for the submitter to fill out so that we can process the submission properly in terms of the specific location for the proposed project.

For projects not in the Department's program, the entire form will need to be filled out (i.e. items # 1 through 10). Hopefully, this will assist you in fielding questions in this regard.

Thank you
